ABOUT ME

BSc. CSIT student passionate about building web applications using the **MERN stack**. I've build projects including a **Learning Management System**, a **Chat App**, and an **E-commerce website**. I enjoy collaborating in teams, writing clean code, and picking up new tools quickly. Currently looking for an internship where I can contribute to real projects and grow alongside experienced developers.

EDUCATION

2024 - 2028

PATAN MULTIPLE CAMPUS

- Bachelors in Computer Science and Information Technology (Bsc.CSIT)
- Relevant Classwork : Data Structures & Algorithms, Operating System, Web Development, Database Management System, Digital Logic, Software Engineering, AI & Machine Learning.

SKILLS

- HTML/CSS/Tailwind
- Javascript/React.js
- Node.js/Express.js
- MongoDB
- Git/Github
- REST APIs

LANGUAGES

- Nepali
- English
- Hindi

PROJECTS OVERVIEW

Learning Management System

A FullStack Project using MERN Stack

- Built a full-stack Learning Management System (**LMS**) with role-based access for Students and Educators.
- Implemented **JWT** authentication including Sign Up, Login, and Forgot Password.
- Allowed Educators to upload and manage lectures while enabling Students to watch lectures and submit reviews.
- Developed **REST APIs** with **Node.js** and **Express.js**, managed data with **MongoDB**, and built a responsive UI using React.js.

Chat-App

A Chat-App project using socket.io

- Built a real-time chat application using **React**, **Node.js**, **Socket.io** and **MongoDB**
- Implemented features like *instant messaging*, *online user tracking*, and **JWT** authentication
- Deployed frontend and backend on *Render* with *Cloudinary* for image storage

E-commerce Website

A FullStack E-commerce website

- Built a full-stack E-Commerce application using the **MERN stack** with separate Customer and Admin panels.
- Admin can add and remove products with image uploads handled via *Cloudinary* and deployed project on *Render*.
- Implemented **JWT** authentication for secure Sign Up and Login.
